

## CLEAN FUELS: LOUISIANA'S ECONOMIC SOLUTION

### Agriculture Solutions

Soybeans were Louisiana's top crop in 2022.

**56.9M**

Louisiana's 56.9 million bushels of soybeans brought \$773.4 million to the state. Biodiesel and renewable diesel supported 8.1% of the value.

**2x**

Bunge Chevron Ag Renewables is investing to double capacity of a soybean processing facility in St. Charles Parish. The company is launching a pilot program to grow canola across the Southeast.

### Louisiana's LEADERSHIP

In August 2020, Gov. John Bel Edwards signed Executive Order JBE 2020-18, committing Louisiana to achieving net zero greenhouse gas (GHG) emissions within 30 years:

2025 = 26%-28% of 2005 levels  
2030 = 40%-50% of 2005 levels  
2050 = Net zero

Louisiana's Climate Action Plan calls for transitioning public fleet vehicles to low- and zero-emission vehicles and fuels:

50% by 2035  
100% by 2050

### Economic Solutions

Louisiana leads the nation in renewable diesel production.

**1,082M** gallons of renewable diesel production capacity

**1,591** full time jobs earning \$74.5 million in annual wages

**\$348M** in economic activity

**2.3B** Diamond Green's renewable diesel plants use 2.3 billion lbs. of waste fats and oils annually.

### ABOUT BIODIESEL AND RENEWABLE DIESEL

Made from plant-based oils, used cooking oils, and animal fats

Clean-burning

Can be used in any diesel engine without modification

Commercially available nationwide

Today's solution for heavy-duty trucking, emergency vehicles, bus fleets, and farm equipment
