CLEAN FUELS: FUELING INDIANA'S ECONOMY

**Economic Indicators**
- 2.38M barrels of biodiesel, equal to 100M gallons, produced in 2020.
- 43M gallons of biodiesel used in 2020, equivalent to 3% biodiesel blend statewide.
- 4% of Indiana drivers used biodiesel blends.
- Full-time equivalent jobs supported by clean fuel production.

**Agricultural Indicators**
- #6 in the nation for biodiesel-producing state.
- U.S. biodiesel and renewable diesel production lowered prices at the pump by 4% in 2021.
- 2.38 million barrels of biodiesel, equal to 100M gallons, produced in 2020.
- 338.4M pounds of Indiana’s soybean oil goes to biodiesel production annually.
- Nearly 300 million pounds of Indiana’s soybean oil goes to biodiesel production annually.
- Economic activity supported by biodiesel production.

**Policy Incentives**
- Fueling Progress: According to a recent study, a tax incentive for biodiesel blends could increase Indiana’s use of homegrown biodiesel by 5.6 million gallons per year. That would support 2,147 full-time jobs and $120.4M in additional wages and drive $223.9M in economic activity.

**Health Benefits**
- Increased Competitiveness: According to the same study, providing tax incentives similar to surrounding states would increase Indiana fuel sales and tax revenue by $159 million.
- Switching to B100 in Indianapolis would lead to:
  - 66% lower cancer burden (equal to 202 fewer cases over an average lifespan)
  - Saving $112 million per year through avoided premature deaths
  - 6,400 fewer asthma attacks annually
  - 2,210 fewer lost workdays annually, leading to greater productivity.

**Indiana’s B20 Club**
- Founded in 2021, in two years club members achieved:
  - 5.8M gallons of B20 used by B20 Club members
  - $2M in estimated health benefits
  - 7 member fleets using biodiesel blends of 20% (B20) at least six months of the year
  - 1,249 vehicles fueled by B20
  - 11 thousand tons of CO2e reduced
  - 664 pounds of particulate matter reduced

Indiana farmers produced more than 338M bushels of soybeans in 2021.

- Indiana drivers used nearly 43 million gallons of biodiesel in 2020, equivalent to a 3% biodiesel blend statewide.
- Full-time equivalent jobs supported by clean fuel production.

**About Biodiesel and Renewable Diesel**
- Made from plant-based oils, used cooking oils, and animal fats.
- Clean-burning.
- Can be used in any diesel engine without modification.
- Commercially available nationwide.
- Today’s solution for heavy-duty trucking, emergency vehicles, bus fleets, and farm equipment.
